TECHNICAL SKILLS:

- **Frontend** – Html, CSS , JavaScript, React
- **Other** – PHP

PROJECTS:

[\[Link\]](#) **The Quotes Hub** - Front End Development

- A comprehensive platform where users can access a wide range of quotes and information.
- Utilized HTML, CSS to create an intuitive and user-friendly interface, ensuring a seamless experience for users seeking the latest quotes and articles on various topics.

[\[Link\]](#) **Waste Management System** - Front End Development

- The Donation & Wastage Management Website is a responsive platform developed with HTML, CSS, and JavaScript, designed to facilitate the efficient management of donations and minimize wastage. Users can easily connect and donate surplus items to those in need.

[\[Link\]](#) **TriClock** - Front End Development

- A Triclock project in JavaScript is a program that displays the current time on a webpage. It uses JavaScript code to retrieve the current time from the user's computer and updates the displayed time in real-time. The project provides a visually appealing and functional way to keep track of time on a website.
